Applicant(s)

GUYAN ET AL.

Examiner

Sam Rimell

Art Unit

2166

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-21 is/are pending in the application.
- 4a) Of the above claim(s) ____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) ____ is/are allowed.
- 6) ☒ Claim(s) 1-21 is/are rejected.
- 7) ☐ Claim(s) ____ is/are objected to.
- 8) ☐ Claims ____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on ____ is/are objected to by the Examiner.
- 11) ☐ The proposed drawing correction filed on ____ is: a) ☐ approved b) ☐ disapproved.
- 12) ☐ The oath or declaration is objected to by the Examiner.

Priority under 35 U.S.C. § 119

- 13) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. ____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.
- 14) ☐ Acknowledgement is made of a claim for domestic priority under 35 U.S.C. § 119(e).

Attachment(s)

- 15) ☒ Notice of References Cited (PTO-892)
- 16) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 17) ☐ Information Disclosure Statement(s) (PTO-1449) Paper No(s) ____.
- 18) ☐ Interview Summary (PTO-413) Paper No(s). ____.
- 19) ☐ Notice of Informal Patent Application (PTO-152)
- 20) ☐ Other: ____.

Claims 4, 5, 11, 12, 18 and 19 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 4, 11 and 18, the phrase "other components of a system" is indefinite, since it is not clear what the components or system might comprise.

In claims 5, 12 and 19, the phrase "other applications" is indefinite, since it is not clear whether these "applications" would be hardware, software, or some other type of system or method.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

Claims 1-21 are rejected under 35 U.S.C. 102(e) as being anticipated by Lau ('247).

Lau discloses a programming system for developing component based software using object oriented programming principles. FIG. 3 discloses a data component in the form of a storage system that is capable of storing, retrieving and manipulating data in the form of completed computer programs that include specific sets of functions. The system further includes client side, or user manipulable component (300) that includes a number of subcomponents. The first subcomponent is an adapter component comprised of structures (302) and (303), which work together. The adapter component (303) transmits and receives data from the data component (308), and cooperates with the adapter component (302) to adapt data received from

Art Unit: 2166

component (301). The second subcomponent is a business logic component (301) that includes the overall logic for manipulating data. The third subcomponent is a controller component (305) that creates completed frameworks for programs. The controller component (305) receives data on events from a user at the terminal (306). The controller component also communicates with the business component (301) and the adapter component (302,303) to persist data to a data repository in the data component (308).

FIG. 4 discloses a task assistant that define the programmed tasks necessary for an event. The tasks are defined in Pane 3 of FIG. 5. The rules that control the tasks are defined in Pane 2 of FIG. 5. The event is the collection of programming objects needed to create a new insurance policy, which begins in Pane 1.

Pane 3 of the client component indicate which tasks have been established.

The programming objects which are collected in Pane 1 derive from a preprogrammed set (or queue) of programming objects, such as the data object (203) or application object (208).

The goal is insurance related, since the final output is programming to produce an insurance policy.

Any inquiry concerning this communication should be directed to Sam Rimell at telephone number (703) 306-5626.
